

Associate Engineer

Job description

About Us

Your new home - Unlocking data to power the real-time enterprise.

Rubicon Red has a proud heritage. If you have a passion for technology and want to join some of the smartest minds in the business, then Rubicon Red is the place for you. Rubicon Red works with best of breed technology using agile and DevOps principles to deliver innovative solutions that enable customers to run their business in real-time.

We have worked hard to build and sustain an enviable culture by placing enormous emphasis on our staff. Recognition of the importance of a healthy work-life balance goes way beyond statements on a poster at Rubicon Red. You will have regular check-ins, take ownership of your personal development, and have flexible working arrangements as standard. We have internal systems in place to support knowledge sharing between our teams.

We've created an environment of collaboration and support with a focus on innovation and growth. We value strong partnerships with our customers, teamwork, integrity, curiosity and continuous learning, and reward and recognise our people for their contributions. It is our incredible people, working together as part of a passionate and committed team that allows us to achieve customer success.

Reports To

The Associate Engineer will report to a people manager and practice manager part of Infrastructure and DevOps of Rubicon Red. They will work under the direction of the Senior Engineers to deliver key outcomes.
